Heblex Fastener(Beton SHimi)

Heblex Radical Fixation:

Heblex radical fastener is a metal fastener that is used to connect Heblex blocks to each other. These fasteners are made of galvanized steel and due to their special design, they have high strength and resistance.

Technical specifications of Heblex Radical Fastener

Type:	Heblex Fastener
Width:	3 cm
Thickness:	2 mm
Application :	Replacement of vestibule connection in AAC walls
product type:	Galvanized steel sheet

The application of Heblex Radical Fixation:

Heblex fasteners are used to connect Heblex blocks in interior and exterior walls, retaining walls, and ceilings.

How to use Heblex Radical Fastener:

To use the Heblex fastener, you must first place two Heblex blocks together. Then, place the fastener in the gap between the two blocks and tighten the screws.

Safety tips for using Heblex fasteners:

Use the right tools to install fasteners.

Tighten the screws properly to prevent the fasteners from loosening.

Use the appropriate fasteners for the type of Heblex block.
