Pool insulation resin

chemical concrete swimming pool insulation resin
BS210:

Pool insulation resin is a chemical used to seal and protect pools. To use pool sealing, add BS200 pool insulation to BS210 pool insulation resin little by little and mix. Apply the obtained putty with a trowel on the wall and floor with a thickness of 2 to 3 mm.

Technical specifications of pool insulation resin	
physical state :	liquid
Color :	white
packing :	9 kg
Mixing ability:	has it
Chlorine ion:	does not have
Expiration date :	One year after production
Maintenance :	away from cold and heat in a closed bucket

Advantages of using pool insulation resin:

- Ability to apply ceramic tiles on insulation
- Excellent color insulation
- High adhesion of cement-based mortars
- Long life, competitive price

Applications of pool insulation resin:

- Sealing ponds, pools and reservoirs
- Sealing corners and surfaces with leaks in water sources
- Insulation of sauna, spa, water and sewage tanks and sewage pipes
- Sealing and insulating bathrooms, toilets, balconies and terraces
- Sealing and insulating basement walls, parking lot floor and roof
- Sealing stone, brick and cement surfaces
- Roof walls that are constantly exposed to rain
- Sealing and insulating ceramic surfaces and bathroom and pool tiles
