Pool insulation (Beton Shimi)

BS200 chemical concrete swimming pool insulation:

Pools are expensive structures that must be properly maintained to last a long time. One of the most important steps to take to maintain a swimming pool is to insulate it. Pool insulation is a protective layer that is used to prevent pool water from leaking and also to maintain the water temperature. Pool insulation is made of various materials such as cement, polymers and minerals. Zarin Chemical Concrete Company offers you a safe and cost-effective method for sealing concrete surfaces such as reservoirs, pools, ponds, fountains, etc. It is consumption.

The first method of using BS200 pool insulation:

Add the pool insulation product to the BS210 pool insulation resin little by little and mix. Apply the obtained putty with a trowel on the wall and floor with a thickness of 2 to 3 mm.

The second method of using BS200 pool insulation:

Add 1 liter of BS500 concrete adhesive and 1 liter of BS200 sealing resin to 6 to 7 liters of water and add pool insulation powder little by little and mix. Apply the obtained putty with a trowel on the walls and floor with a thickness of 2 to 3 mm.

Note: Each insulating bag is suitable for 5 to 7 square meters.

Technical specifications of polymer pool insulation	
physical state :	three components
Color :	Gray
packing :	25 kg bags and one liter gallon
product type :	Polymer cement base
Mixing ability:	in the water
Chlorine ion:	does not have
Expiration date :	One year after production
Maintenance :	away from cold and heat in a closed bucket
