## Scope Z(Beton SHimi)

### What is the scope Z?

Scoop Z is a plastic or metal tool used to install stone and ceramics. A Z-scope usually has two wings that are connected at an angle. These flaps allow the Z-Scope to grip the stone or ceramic surface and hold it firmly in place.

Scope z technical specifications	
Type:	Scoop
Color :	silver
Width:	20 mm
Thickness:	1 to 2 mm
product type :	stainless steel
Application :	stone-ceramic

### How to use the scope Z:

To use the Z scope, follow these steps:  
Determine the location of the stone or ceramic.  
Apply stone or ceramic glue on the desired surface.  
Place the stone or ceramic in its place.  
Place the Z scope in the right place.  
Secure the Z scope with a hammer blow.

### Advantages of using a scope Z:

Using the scope Z has many advantages, including the following:  
Ceramic and stone installation speed:  
Z scope increases the speed of stone and ceramic installation.  
This is because there is no need to use other tools to adjust the distance between stone and ceramic.

### Accuracy of stone and ceramic installation:

Scope Z increases the accuracy of stone and ceramic installation.  
This is due to the proper design of the Z scope, which makes the stone or ceramic to be placed next to each other in an orderly and uniform manner.
