Sealing concrete glue (Beton SHimi)

sealing concrete glue BS200:

This resin with high sealing properties and flexibility is suitable for sealing cement based mortars and increasing its adhesion and flexibility. This resin is used together with BS200 pool insulation to seal the pool and concrete tanks. Sealing concrete glue is a type of glue that is used to seal concrete surfaces. This adhesive is made of polymer compounds, resins and special additives.

Technical specifications of concrete sealing glue

physical state :	liquid
packing :	1-4 kilos
product type :	Polymer cement base
Mixing ability:	has it
Chlorine ion:	does not have
pH:	7
Expiration date :	One year after production
Maintenance :	Protected from air

Properties of BS200 sealing concrete adhesive:

High adhesion to concrete
Resistance to water and humidity
flexibility
long life

Application of BS200 sealing concrete adhesive:

Sealing pools, water tanks and other water structures
Sealing of underground surfaces
Sealing the internal and external surfaces of buildings
Sealing industrial surfaces
