## Tile glue (Beton SHimi)

### Waterproof pool tile glue:

The use of ceramic tiles in swimming pools and water spaces is common due to its beauty, durability and resistance to moisture. But for the basic and permanent installation of these ceramics, we need an adhesive with special characteristics. Pool waterproof tile adhesive is a specialized product designed and produced for this purpose.

#### Specifications of pool waterproof tile adhesive

physical state :	powdery
Color :	Gray
packing :	kg bags 20
Mixing ability:	has it
Chlorine ion:	does not have

### Applications of BS650 waterproof tile adhesive:

Suitable for all types of tiles, ceramics, stones, tiles and bricks, etc.  
Suitable for porcelain ceramics  
Suitable for slab stones  
Suitable for all types of plaster and concrete walls  
Suitable for wet places such as toilets, bathrooms and kitchens  
Suitable for swimming pool, sauna and jacuzzi  
Suitable for indoor and outdoor use

### How to use BS650 waterproof tile adhesive:

For a 20 kg bag, pour 5 liters of water into a large bucket and add the bs650 tile adhesive bag little by little and mix.  
Be sure to do the mixing operation with the mixer, this will make the mixing speed and complete.  
Put the prepared putty on the surface or back of the ceramic, it is recommended to use one liter of BS500 concrete glue in each bag of BS650 tile glue for slab stones and porcelain ceramics..

### The consumption of BS650 waterproof tile adhesive:

Depending on the surface of the work, usually about 4 to 5 kg of glue is used per square meter.
